

Fed up of  
maintenance  
cost

Want to exalt to  
Industry 4.0

Stern about  
increasing  
productivity

Longing for  
longevity  
of the  
machineries

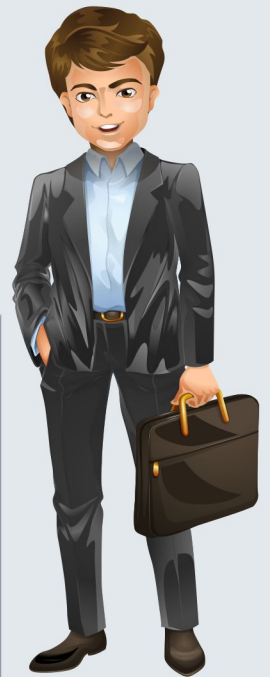

Looking  
for an  
**active**  
**lubrication**

decisive solution  
for  
dynamic Industrialists.....

# TRIBOLOGIST

# INDUSTRIALIST

Do you lubricate your machineries optimally?

Yes. Of course.

How do you achieve it?

Manual lubrication with the help of a Grease gun.

Are you really aware of TRIBOLOGY's recommendation on lubrication?

No. I am not. What is it?

Tribology's **CORE** concept on lubrication is:

Choice of right lubricant

Optimum dosage delivery of lubricant

Reduced intervals of lubricant delivery

Ensuring adequate lubricant level always

How often do you lubricate?

Once in a month or bimonthly depending upon the lubricating points.

Do you think it is the optimum lubrication process?

Certainly. No doubt about it.

Wont you vomit the entire food if you consume breakfast, lunch and dinner altogether? Similarly, in lubrication process it is mandatory to deliver the right quantity of lubricant at right intervals of time.

Such process is known as "OPTIMAL LUBRICATION". This could be achieved only by SIPOAL - a smart single point automatic lubricators and not by manual lubricating process.

Fantastic and really an eye-opening explanation. I will at once implement the automatic lubricating system

Then your only choice is IIoT based SIPOAL, which is technologically advanced SMART SINGLE POINT AUTOMATIC LUBRICATING DEVICE with refillable cartridge and rechargeable battery.

Exactly you are right.
